Dear Colleagues,

On behalf of the American Immunization Registry Association (AIRA) board of directors and staff, welcome to the AIRA 2023 National Meeting. We are so excited to welcome you all back in person and to be able to provide the IIS community another great opportunity to connect with and learn from one another.

This year saw the highest number of abstracts submitted in the history of the AIRA National Meeting. This goes to show how much incredible work is happening within the IIS community and how excited we are to share all that we have accomplished in the last year. The next two and a half days promise to be packed full of great content showcasing all of that incredible work.

This year's meeting will kick off with an opening plenary featuring keynote speaker Dr. Saundra Dalton-Smith. Dr. Dalton-Smith is a physician, international wellness expert, and author who will provide invaluable insights and help us discover the secrets of burnout prevention in hybrid teams.

Throughout the rest of our time together, there are six breakout sessions each offering content on five different topic areas such as IIS modernization, onboarding and provider training, dashboards, consumer access and outreach, outbreak response, data exchange, and much, much more.

Thank you to everyone who submitted content and volunteered to lead discussions. Your time is valuable, and your contributions are what make this meeting such a success. I also want to thank all of our national meeting sponsors. Without your support, this event would not be possible.

Enjoy the meeting and your time in beautiful San Diego!
